Subject: Microsoft Settlement

You guys won't do any harm to economy if you just do what you're supposed to do - beat Microsoft and make them pay. Instead you just think short-term and let Microsoft go because you believe this will help boost the economy. Come on! This is a chance of a lifetime to do something about it. With over \$30 billion to spend, Microsoft isn't going to just drop dead. That money is not going to be used for innovations. It is just to stifle competition and beat its rivals. It is a real waste you guys come so close just to give it all up. Think of what will happen if AT&T isn't broken up 20 years ago - our phone, our cable, the internet will probably be all AT&T. Let's do something for the future economy and get a better deal for the settlement.

Thanks,
Kevin.
